

## VISUAL STANDARD

# Safe access and egress

### Hierarchy

- Hard standing tarmac or concrete routes
- Compacted type 1
- Other.

### KEY POINTS

- All people are segregated physically from traffic movement
- Access routes are clearly marked around project and at work locations
- Storage of materials on access is prohibited
- Level changes on access is visibly marked and any steps, ramps are formed correctly through temporary works and maintained
- Lighting on access and at task location is sufficient lux levels.
